

2022 Request for Proposals

Kansas NASA EPSCoR Program

NASA Notice of Funding Opportunity (NOFO) - previously a CAN

NASA in Kansas

The Kansas NASA EPSCoR Program (KNEP) is seeking proposals for eventual submission to a NASA FY 2022 Notice of Funding Opportunity (NOFO). This research opportunity, previously a CAN, includes up to \$750,000 in funding for three years. All NASA EPSCoR monies must be cost-shared at a level of at least 50% with non-federal monies. In-kind cost sharing is allowable, but NASA encourages proposers “to consider methods that add value to the jurisdiction's existing research capabilities.”

The CAN efforts must:

- Contribute to and promote the development of research capability in NASA EPSCoR jurisdictions (e.g., Kansas) in areas of strategic importance to the NASA mission;
- Improve the capabilities of the NASA EPSCoR jurisdictions to gain support from sources outside the NASA EPSCoR program;
- Develop partnerships among NASA research assets, academic institutions, and industry; and
- Contribute to the overall research infrastructure and economic development of NASA EPSCoR jurisdictions

Interested investigators submit proposals directly to KNEP (not NASA). The KNEP due date is **noon January 14, 2022**. Following reviews, KNEP will recommend one (1) proposal for final preparation and submission to NASA.

KNEP selection is competitive and based on section 5.0 criteria identified in the NASA NOFO NNH22ZHA005C announcement. Be sure to also address fundamental EPSCoR objectives (e.g., respond to NASA priorities, build national competitiveness, establish NASA partnerships, economic development, education, etc.).

KNEP will attempt to secure additional funding from the state of Kansas to help meet cost-share requirements. However, given state funding uncertainties and the short NASA timeline, investigators should aggressively pursue all needed cost-sharing funds on their own from other sources. Investigators will be notified, through their institutional representative, if KNEP is able to secure additional funding to help meet matching requirements.

There is a 20-page limit for all KNEP proposal content (no exceptions). Use one-inch margins, a 12-pt times new roman font, and single-spaced text. Proposals must include the signature of the submitting Organization's Authorizing Official, demonstrating approval and a commitment to meet cost-share requirements.

Submit a single proposal document in PDF-format (less than 2-MB in size) to the KNEP director, via Email (scott.miller@wichita.edu), **by noon January 14, 2022**.

To access a copy of the related NASA NOFO document, go to <http://nspires.nasaprs.com> and search for NNH22ZHA005C. If necessary, you can also contact the KNEP Coordinator (kerry.majher@wichita.edu) or visit the NASA in Kansas web site (www.NASAIinKansas.org) to get a copy of the NOFO.

Also feel free to Email or call the KNEP director, Scott Miller (scott.miller@wichita.edu & 316-978-6334), with any other questions.
