

NASA EPSCoR 2024 Request for Proposals

Kansas NASA EPSCoR Program

International Space Station Flight Opportunity (EPSCoR ISS)

State Proposals Due: Noon, Friday, March 1, 2024

The Kansas NASA EPSCoR Program (KNEP) is seeking proposals for eventual submission to NASA Notice of Funding Opportunity (NOFO) announcement number NNH24ZHA004C.

As outlined in the NASA announcement, *“the ISS will provide the integration and flight opportunity. There are a variety of laboratory facilities and capabilities designed to support a range of scientific disciplines on the ISS.”* For the ISS opportunity, ground-based research should be established and *“all proposed projects should be mature enough to transition to a flight experiment with little or no additional NASA funding during the PoP.”*

NASA plans to make up to five awards of \$150,000 each in funding. The period of performance will be three years. There are no cost-sharing requirements although it may be voluntarily offered.

The Fiscal Year 2024 International Space Station Flight Opportunity (EPSCoR ISS) announcement may be found [here](#) on NSPIRES. You may also visit the NASA in Kansas website [here](#) to get a copy.

Kansas can only submit one proposal to NASA. Therefore, KNEP will carefully review and recommend one proposal for final preparation and submission to NASA by April 15, 2024. KNEP selections are competitive and based on criteria identified in the NASA announcement. The KNEP proposal due date is **noon on Friday, March 1, 2024**.

Interested investigators should submit proposals in PDF-format (less than 2 MB in size) via email to both the KNEP director (Linda.Kliment@wichita.edu) and NASA in Kansas (NASAINKansas@wichita.edu) by **noon on Friday, March 1, 2024**.

Please feel free to email or call the KNEP director, Linda Kliment (Linda.Kliment@wichita.edu, 316-978-6354), with any questions.
